

CRISTIANO SOUSA

Data Engineer

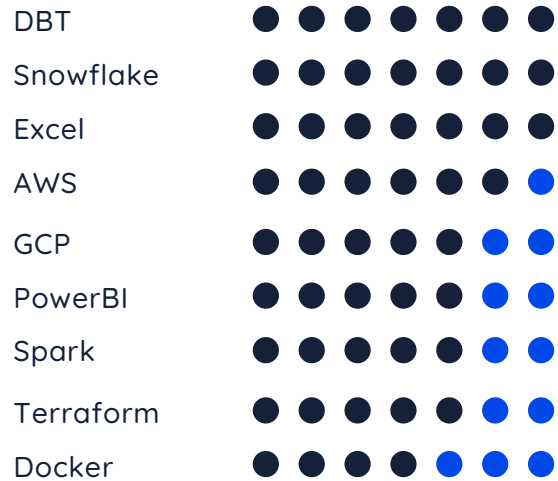

I'm a data-driven problem solver with a passion for building scalable data solutions. I specialize in designing efficient ETL pipelines, optimizing databases, and enabling data-driven decision-making. My experience spans across data engineering, analytics, and business intelligence, having collaborated with cross-functional teams to transform raw data into actionable insights.

PROFESSIONAL EXPERIENCE

Data engineer II | 2022–Present

TestGorilla

- Design and maintain scalable data pipelines and ETL processes. (AWS Glue & DBT)
- Monitoring production databases for slow queries and work on their optimization.
- Maintaining Infrastructure as code using Terraform.
- Script development to identify and remove PII from staging and development environments.
- Development of script to create a db dump with minimal data for platform normal functioning. Was used by devs on their local environments.
- Develop and manage data warehouse schemas and databases, ensuring data integrity and governance. (DBT & Snowflake)
- Collaborate with cross-functional teams (data, developers, marketing, product) to provide clean, accessible datasets and implement data-driven solutions.
- Development of Analytical data models & Data Visualization Dashboards. (Metabase & Holistics)
- Onboard new team members.

Data Engineer | 2020–2022

Teleperformance Portugal

- Design and maintain scalable data pipelines and ETL processes. (SSIS)
- Creation of C# Script to allow parametrized source Extraction and Loading to SQLServer.
- Development of Stored Procedures to handle data orchestration.
- Develop and manage data warehouse schemas and metrics. (SSAS)
- Development of Analytical data models & Data Visualization Dashboards. (PowerBI)
- Onboarding new team members and initial training when needed.

Inside Sales Data Analyst | 2019–2020

Uber

- Report and Dashboard Development (Tableau)
- Design and maintenance of ETL processes. (Python)
- Data Analysis related tasks such as root cause analysis, forecast and preparation of Business Reviews with relevant insights.
- Automation of repetitive tasks.
- Process Improvement and Optimization
- Creation of Salesforce reports and dashboards

Business Intelligence Consultant | 2018–2019

Closer Consulting

- Report and Dashboard Development (PowerBI)
- Design and maintenance of ETL processes.(SSIS)
- Development of Olap Cubes (SSAS)
- DBA (SQL Server)

Data Analyst | 2016–2018

Teleperformance Portugal

- Create, develop and automate dashboards (PowerBI)
- VBA Script Development for Excel & MSAccess Automation.
- Maintain local databases to support Excel based reports.
- Prepare Weekly/Monthly Business Reviews.

EDUCATION

ISCTE | 2010–2014

Bachelor in Computer Science
